

### **TOOL 1.1: Your program's five why's**

This tool is intended to make you stop and think about the five why's in your program, even if you choose not to perform as a group activity at this time. Each why may lead in multiple directions, so this form represents a simplified approach to this technique. Feel free to record the information in ways that make best sense for your group. Add lines and take as much space as you need.
